**Micro-Coax Announces The Launch of MKR Ruggedized Test Cables**

**Pottstown, PA - January 11, 2010:** Micro-Coax announces the launch of its new and improved ruggedized MKR microwave test cable assemblies available immediately. The MKR test cables have passed strenuous lifetime qualification testing to insure long term reliability.

MKR represents the best in Micro-Coax technology. Using its industry leading UTIFLEX microwave cable as a base, Micro-Coax then fits MKR with an additional highly flexible and abrasive resistant ruggedization.

The resulting integrated product is an ideal choice for test labs or any testing environment requiring excellent mechanical strength and long term reliability.

**About Micro-Coax:**

Micro-Coax is a leading provider of transmission line solutions for radio frequency (RF) and microwave applications. Serving the defense, satellite, telecommunications, test and measurement markets for more than forty years, Micro-Coax has earned a reputation for mission performance and excellent customer service. A broad technology base allows Micro-Coax to quickly respond to customer needs with optimized solutions of coaxial cables, connectors, harness assemblies and conductive fibers.
